

**Chemical Engineering in Medicine and Biology:  
Proceedings of the Thirty-Third Annual Chemical  
Engineering Symposium of the Division of Industrial  
and Engineering Chemistry of the American Chemical  
Society, Held at the University of Cincinnati,**

Filesize: 4.3 MB

***Reviews***

*Very useful to all of group of folks. I could possibly comprehended every little thing using this created e book. You wont truly feel monotony at anytime of your time (that's what catalogs are for concerning in the event you ask me).*

*(Claire Carroll DVM)*

**CHEMICAL ENGINEERING IN MEDICINE AND BIOLOGY:  
PROCEEDINGS OF THE THIRTY-THIRD ANNUAL CHEMICAL  
ENGINEERING SYMPOSIUM OF THE DIVISION OF INDUSTRIAL AND  
ENGINEERING CHEMISTRY OF THE AMERICAN CHEMICAL SOCIETY,  
HELD AT THE UNIVERSITY OF CINCINNATI,**

Springer-Verlag New York Inc. Paperback. Book Condition: New. Paperback. 658 pages. Dimensions: 9.9in. x 7.0in. x 1.5in. There is much discussion today concerning Bioengineering (or Biomedical Engineering). It is not exactly clear what these names signify, particularly in chemical engineering. Some have suggested retreading the old war horse Biochemical Engineering (or was it Biomedical Chemical Engineering). In an effort to demonstrate the on-going activities of chemical engineers in the life science area, we accepted the invitation of the Industrial and Engineering Division of the American Chemical Society to organize the 33rd Annual Chemical Engineering Symposium. We decided to call the symposium, Chemical Engineering in Medicine and Biology, and hence avoided the problem of having to decide which bio prefix to use. Many chemical engineers in the academic and industrial world were contacted. From these contacts and a good deal of publicity arose the Symposium. The two-day meeting was held at the University of Cincinnati in the Losantiville Room of the Student Union Building on October 20-21, 1966. Twenty-one papers were presented on topics relating chemical engineering to medicine and biology. The papers were representative of the scope of the activities across the country with presenters coming from Washington, California, Massachusetts, New York, South Carolina, Wisconsin, Iowa, Pennsylvania, Michigan, Indiana and Texas. Topics ranged over blood flow properties, diffusion in blood phenomena, introduction to mass transfer in the eye, artificial kidney analysis, separation of bacteria by ion exchange, mathematical modeling of drug distribution, carbon dioxide respiration, photosynthetic kinetics, water in frozen tissues, electrophoretic separation of proteins, and outer space research on life support systems. This item ships from multiple locations. Your book may arrive from Roseburg, OR, or La Vergne, TN. Paperback.
